EXPERT OF SKIN PROBLEMS
CARE FOR THE SMALLEST ONES
ELIMINATE HARMFUL ELEMENTS

SERUMS

SERUMS

Serums play a key role in skincare, containing a few active ingredients at higher concentration to address specific issues. They are lightweight and absorb quickly, so apply them right after cleansing.

ANTIBACTERIAL SANITIZERS, HAND WASHES

Antibacterial products tend to prevent the skin from the growth or spread of bacteria, enveloped viruses. Alcohol based sanitizers kill most bacteria, fungi and stop some viruses if they contain at least 70% alcohol. JimJams sanitizers have more than 70% alcohol content, so they have antibacterial properties with justification. The products of the line do not dry out the skin, while provide maximum protection for everyday.

JimJams Antibacterial hand and skin sanitizers
