

## Treatment plan – Gold Luxury

### Gold Luxury Treatment

The process of treatment should observe a strict protocol, in the spirit of maximal service, as gold means prosperity and luxury for everybody. Close contact with the customer is important, that is why there are several massages. Try to pay attention to this even at a simple washing. Try using methods and tools that make the treatment special.

#### **Area of use:**

For superficially or deeply dry, highly sensitive, oil-deficient, energy-deficient skin with thinned epithelium, prone to allergies.

For scaly seborrheic, dehydrated skin showing signs of wrinkles.

The aims of the treatment:

- 1 restoring the skin's hydration
- 2 returning a sufficient amount of grease to form an emulsion on the skin surface
- 3 increasing skin turgor
- 4 refining skin tone
- 5 reducing potential erythema

### **The process of the treatment:**

#### **Cleansing:**

##### **Solanie Face Milk for Sensitive Skin - SO20101**

*Perfume free cleansing emulsion. With the help of skin friendly and surface active ingredients totally and gently removes pollution or make up from facial areas. The ingredients insure that it can be used for all skin type.*

#### **Usage:**

*Clean the skin of contaminations with massage movements using the appropriate amount (a nut-sized amount for face, a walnut-sized amount for face, neck and décolletage) of the cream. You can apply the appropriate amount to two cotton pads or to the treated area using your fingers and palm, or you can put it into water in a little pot and apply it with a brush.*

#### **Effects:**

*Odorless liquid emulsion. By means of its skin-friendly surfactant ingredients, it removes contaminants and make-up perfectly and gently from the facial skin. By virtue of its compounds, it can be used for all skin types.*

### **Peeling:**

#### **Solanie Mango-Rice AHA Facial Peeling - SO20901**

*The tolerant scrubbing effect of Round Rice granules removes dead skin cells, improves circulation. Diatomite, its other scrubbing ingredient, performs cleansing of pores and absorption of dirt. Fruit acids and enzyme contents of Papaya and Mango extracts, enriched with glycolic and lactic acids, loosen the layer of aged horny matter.*

### **Usage:**

*Apply the appropriate amount of brush to the cleared skin (ca. a half of a walnut-sized amount for the face, and a walnut-sized amount for face, neck and décolletage), and after slight rubbing (which can be done with wet hands), wait for few minutes for the fruit acids to take effect. The mechanical effect can be enhanced with the usage of a peeling brush, but the acids contained in the product also perform a fine peeling on the skin surface on their own. Remove the brush's grains with wet clothes or sponge, and then tone the skin.*

### **Effects:**

*The gentle rubbing effect of rice grains removes dead skin cells, improves circulation, it virtually rejuvenates the skin surface. Its other abrasive material, the fine diatomaceous earth of marine origin, provides for pore clearance and contamination removal. The fruit acids and the enzyme content of mango and papaya extracts, enriched with glycolic acid and lactic acid, loosen the old horny layer, stimulate the formation of new cells, thus helping the formation of healthy skin. The synergic effect of the materials and the mechanical peeling creates an even skin surface. The nurturing avocado oil, as well as the anti-irritant and hydrating betaine and allantoin have skin protecting, normalizing effects.*

### **Effects:**

*Hyaluronic acid is an important component of the connective tissue. It ensures the skin's flexibility and tightness by filling the intercellular space and strengthening the collagen network. Its production is reduced in our system by aging. Its shortage is one of the main causes of wrinkle formation. For supplementation, the serum contains a high concentration of this important, biotechnologically produced substance, in a form that is absorbed well. Its regular usage reduces significantly the apparent signs of aging; it spectacularly improves the condition of the skin. Its high water-binding and water-holding capacity – especially together with the new special hydrating substance, Hydrolite – increases the hydration of the connective tissue in a natural way. It provides for the skin's juvenile tone and tightness. The depth of the wrinkles is reduced, and the epidermis becomes silky, even and soft to the touch. The serum's other active ingredient of decisive importance are the gold nanoparticles. They provide for the better absorption of hyaluronic acid, as well as for its utilization in the epidermis; their catalytic effect has a positive influence on the functioning of the cells.*
