

Treatment plan – Grape-Hyaluron line

The Grape-Hyaluron products contain a unique antioxidant complex, which protects skin cells from harmful external and internal effects. Due to its high content of hyaluronic acid and special plant's extracts, it has an extraordinary anti-aging effect.

The main component of these products is the TO Complex®. It takes up the fight with free radicals, which are formed because of the energy use of cells and harmful external environmental effects. Based on the specific formulation of synergistic components (Vitamin A, C and E), this complex is able to neutralize existing free radicals and prevent the formation of new ones. Hyaluronic acid is also an important ingredient and it has a 3-way effect: moisturizes, makes the connective tissue more elastic and inhibits water loss through skin. Active plant extracts act as Botox, so they prevent development of wrinkles by blocking facial muscles.

The area of usage:

Treat thin, sensitive, tired, stressed, dehydrated skin. It is very efficient for early wrinkles too.

Aim of the treatment:

- Activating skin's ability to absorb active ingredients better
- Restoring skin's hydrophilic lipid
- Reducing fluid flow on the skin surface
- Activating skin cells production
- Increasing the elasticity of dermis
- Reducing inflammatory processes in the skin

Treatment step-by-step:

Cleansing:

SO21703 Grape- hyaluron foamy cleanser 500ml

Foamy cleanser with antioxidant effect, protects skin cells against oxidative damage. The valuable component of the product is organic grape water, which is rich in minerals and trace elements. Energizes the cells and neutralizes free radicals. Sugar-based surfactants make it foamy, and lipoamino acid softens the skin and loosens the accumulated dirt.

Peeling:

SO21704 Grape- hyaluron facial scrub 125 ml

Mechanical peeling with real grape seed pieces. Rich in polyphenols, thus it has an outstanding antioxidant effect and inhibits free radical formation. Even in the cleansing phase it protects the skin cells and prevents the skin from oxidative damage. Glycerin, derived from plant, improves the water-binding capacity of the epidermis, therefore the skin does not dry out during the peeling. Squalane component provides silky feeling.

Treatment plan – Grape-Hyaluron line

Tonifying:

SO21702 Grape-hyaluron hydro tonic 500 ml

Face cleansing lotion with antioxidant effect, protects skin cells against oxidative damage in the first phase of skin care. The valuable component of the product is organic grape water, which is rich in minerals and trace elements. Energizes the cells and neutralizes free radicals. Lipoamino acid softens and deep purifies the skin, loosening the dirt accumulated during the day. Hyaluronic acid hydrates the epidermis, preventing the skin from dehydration during cleansing.

Moisturizing:

SO31700 Grape-Hyaluron line filler serum 30ml

This deep moisturizing serum contains precious grape water and active compounds which promote skin cell regeneration, and boost ceramide production, thereby improving lipid barrier function. Regular use significantly decreases the visual signs of skin aging, leaving the skin smoother and flexible. Suitable for all skin types.

Ultrasonic treatment + massage

SO21708 Grape-hyaluron massage mask with TO Complex 100 ml

Thanks to its unique formula the Grape-hyaluron massage mask is not only for moisturizing and hydrating, but can be used for massage as well. The special TO Complex(R) neutralizes the skin cells damaging free radicals and protects cells from damaging with its outstanding antioxidant capability. Cocoa butter, shea butter and evening primrose oil nourish the skin and help restore its natural structure. However, it is also suitable for 10-15minutes massage.

Nourishing:

SO21705 Grape-hyaluron Moisturizing creamgel with TO Complex 125 ml

Special "hidroxidant" effect for special needs. Intensive moisturizing creamgel with triple action. TO Complex developed by researchers, neutralizes the skin cells damaging free radicals and protects cells from damaging with its outstanding antioxidant capability. There is a multifunctional emulsifier, which is able to hydrate and protect skin by preventing the transepidermal water loss, increasing the water binding capacity and improving the barrier function of the epidermis by stimulating production of the skin's own important structural elements. Argan oil has extremely high levels of Vitamin E and unsaturated fatty acids, these agents nourish and rejuvenate the dry, dehydrated skin. Three-way component of hyaluronic acid improves skin elasticity, reduces wrinkles and keeps skin moisturized.
